

GXP OpsView®

Ensuring safety and security through advanced operational planning and incident response

Whether for security operations, crisis response, or advance planning for an emergency situation, GXP OpsView® provides situational awareness through strategic planning tools, simplified communications, and a Common Operating Picture (COP).

Enabling mission command to effectively coordinate field operators in real-time throughout an operation, event, or crisis situation, GXP OpsView provides:

- » Visual representation of an operation or emergency action plan via Collaborative Response Graphics® (CRG®)
- » Real-time blue force tracking layered on top of the CRG
- » Field data uploads including photo files
- » Enhanced coordination and collaboration tools
- » Rapid tasking and deployment of field personnel

From an efficient dashboard view enabling strategic management of multiple operations, to a focused incident view supporting asset deployment and real-time communications, GXP OpsView brings an unrivaled degree of command and control to operational planning and tactical response.

GXP Geospatial solutions to ensure **a safer world.**

GXP OpsView provides critical planning and response support for:

- » Active assailants, terrorist attacks, and hostage situations
- » Emergency management and disaster relief
- » Wildland firefighting and prevention
- » Search and rescue operations
- » Drug Interdiction and high-risk warrants
- » Private security for corporate offices, industrial facilities, and events

Dashboard view for operations oversight

Providing a strategic view of your entire organization, the GXP OpsView Dashboard provides oversight into all active incidents in real-time while providing access to historical incidents for reporting, review, forensics, and training.

- » COP of all active incidents via list and map views
- » Content overlays on the map view via standards-based data sharing
- » Rapid identification of all responders and available resources
- » Simplified communication with field personnel
- » Strategic viewpoint for executing operational strategy across all activity

CRGs provide a COP and an accessible visual representation of an emergency action plan for all response personnel including:

Incident Detail view for efficient response

The Incident Detail view allows users to drill down into a specific incident to see details regarding personnel, tasking, operation files and content, and communications.

- » Multi-layered CRG
- » Teaming tools for rapid execution of Incident Command best-practices
- » Real-time tracking with bread crumbs for previous asset location
- » Enterprise-wide sharing of incident data
- » Uploads of field data (including photos)

- » Gridded Reference Graphics overlaid onto current site maps
- » Precise measurements of distance and elevation, degree of slope, and Line of Sight
- » Critical data including staging areas, evacuation zones, vantage points, hazards, and roadblocks
- » Real-time tracking of response personnel via mobile devices
- » Data-agnostic support for imagery registration and overlays onto the plan
