

# GXP ONSCENE

## CORPORATE SECURITY SOLUTIONS

## SUPPORTING CORPORATE SECURITY IN ACTIVE ASSAILANT SITUATIONS

**When responding to active assailants in a corporate environment, every second counts, and the safety of your employees is of paramount importance. A clear understanding of the specific positioning of not only your security personnel, but all employees of your organization, is critical to a successful outcome.**

Leveraging the power of the GXP Platform, GXP OnScene displays a tactical Grid Reference Graphic (GRG) overlay on top of up-to-date, customized facility maps for effective communication and response planning. The location of both corporate employees and WV security personnel is clearly displayed on the map via mobile device GPS, providing situational awareness as well as the location of endangered personnel, thereby allowing security to coordinate and direct a response in real-time.

The GXP OnScene mobile application allows corporate security personnel and first responders (including local police and tactical SWAT teams) to work from a common operating picture for maximum efficiency and shared geospatial awareness at the scene of a crisis.

### GXP ONSCENE ALLOWS YOU TO:

- Quickly identify the precise location of your employees
- Identify and communicate extraction routes
- Maintain visibility of all security personnel locations as the situation evolves
- Develop a coordinated response via GRG among both security personnel and first responders
- Share maps and location data in real-time
- Develop post-event incident reporting

### POWERED BY THE GXP PLATFORM

GXP OnScene also works directly with SOCET GXP® to create reports and products with integrated geospatial reference for use during investigations and for post-incident reporting. Products can then be stored in the GXP Explorer® catalog and shared or utilized for further analysis.
