

GXP[®] solutions for public safety

Providing full operational visibility to both incident command and first responders, the GXP Public Safety Solution bundle featuring GXP OpsView™ enables mission command to effectively coordinate and direct personnel in real-time through an event or crisis situation.

Combining innovative mobile applications with our cloud-based discovery, sharing, incident management, and imagery exploitation software, this solution bundle enables a common operating picture for all first responder personnel. Collaborative Response Graphics (CRGs), overlaid on top of up-to-date site maps featuring critical mission intelligence, ensure an expedited and effective tactical response to the threat at hand.

GXP Geospatial solutions
to ensure a safer world.

BAE SYSTEMS
INSPIRED WORK

Server solutions

GXP Xplorer®

A revolutionary data management solution that enables rapid location, retrieval, and sharing of geospatial data files across disparate data systems – paving the way for advanced geospatial exploitation.

GXP OpsView

A web-based command and control solution that enables planning, tactical response, and after-action coordination of a mission, event, or crisis - paving the way for faster, safer incident resolution.

Desktop solutions

SOCET GXP®

An unrivaled geospatial exploitation software solution that uses imagery from satellite and aerial sources to identify, extract, and analyze ground features, allowing for rapid product creation.

Mobile solutions

GXP OnScene

Providing a common operating picture to both incident command and first responders, GXP OnScene uses CRGs to display operational plans and real-time location of field personnel on both mobile devices and desktops via device GPS, allowing mission command to coordinate and direct personnel through an event or crisis.
